EDUCATION

MSc in Biomedical Communications, University of Toronto
BEng in Biological Engineering, Konkuk University (GPA: 4.47/4.5)

WORK EXPERIENCE

Research Assistant, MD Anderson Cancer Center / Jun 2025-Current

- Built a prototype VR environment for the 6-Minute Walk Test for cancer survivors using Unity and a PICO headset, developed the accompanying research protocol, and presented the project at the 2026 Annual Virtual Reality and Healthcare Global Symposium in Tampa, Florida
- Developed an interactive web app and downloadable worksheets for diagnostic imaging and medical laboratory science toolkits, and led a one-day workshop for Texas high school teachers to support classroom implementation and healthcare career exploration.

Medical Illustrator, Samsung Medical Center / Jun 2022-Aug 2023

- Performed medical image segmentation and patient-specific 3D reconstruction for hepatocellular carcinoma and living donor liver transplantation cases using Materialise Mimics, and developed 3D-printed surgical guides for surgical planning, simulation, and patient education
- Graphical abstract design for medical research publications

Research Assistant, Incheon Catholic University Biomedical Communications Lab / Mar-Aug 2022

- Created vector-based icons and graphic templates for biomedical content

Medical Operations Trainee, Sanofi-Aventis Korea / Jul 2020-Jan 2021

- Assisted in operating clinical studies and executing medical programs

PROJECTS

ICUrWave - Master's Research Project: Mobile Interactive NMES Therapy Training App

- Led the end-to-end design and development of a scenario-based NMES training app, including user research, content-expert collaboration, project planning, UX/UI design, 3D asset creation, Unity development, and TestFlight deployment

AngioPilot - Immersive Interventional Radiology Training / Mar 2025-Current
In collaboration with medVR and Massachusetts General Hospital

- Designed a self-directed, gamified Apple Vision Pro simulation for splenic trauma embolization training, collaborating closely with clinicians and developers to translate clinical workflows into UX/UI interactions and anatomically accurate visual assets
- Selected as a scientific abstract presentation at the 111th Scientific Assembly and Annual Meeting of the Radiological Society of North America held in Chicago, Illinois

AnatoMEE (Anatomical Online Mapping–Exploration–Extrapolation) / Sep 2023-Aug 2025
In collaboration with Division of Anatomy at University of Toronto

- Contributed to a gamified anatomy web app by creating 3D bone models, interactive web elements, and 2D animations
- Led focus-group usability testing with undergraduate students, including participant recruitment, survey design, prototype preparation, and iterative refinement based on user feedback
